

## Case Study – Global SAP Launch

Global chemical manufacturer required Senior SAP Consultants to support global ERP launch

**Client:**  
Global Chemical  
Manufacturing Company

**Industry:**  
Chemical

**Service Provided to Client:**  
- IT Staffing

**The Challenge:** The client was launching a five year initiative to implement SAP 4.6C as its Enterprise Resource Planning software solution. The rollout of the ERP system would cover more than 10,000 employees in virtually every region and country in which the company conducts business. The new system would impact a variety of processes, including finance, environmental health and safety, and order to cash.

The client had discovered that their implementation partners staffed SAP senior and mid-level module-specific positions at premium pricing. Looking to get the greatest value for their money, the client sought an SAP staffing partner with the resources, experience and knowledge in SAP products to provide senior SAP consultants in a timely and cost-effective manner.

**The Solution:** The client engaged Judge Consulting Group's SAP Practice to provide the high-caliber talent needed to support the implementation. Judge delivered cost-effective global staffing support of functional and technical SAP consultants possessing 10+ years of module and industry specific experience.

- Judge recruited and placed 40 qualified SAP consultants with significant savings to the client in comparison to competing vendors
- Additionally, Judge provided permanent placement services of Senior SAP professionals for the global launch

**The Result:** Along with the assistance of The Judge Group, the client was able to successfully complete the implementation on-time and within budget. The implementation resulted in the client's ability to deliver performance information quickly so the management team can spend their time focusing on the future. The Judge Group continues to respond with success to the client's ongoing staffing needs.
